

Activate Finals

When the home and away season reaches its end, the automatic finals allocation can be activated.

Teams will be assigned to the finals slots based on the criteria set in the Finals Fixture Template used.

Activate Finals

Ensure all ladders are checked for the grades that need to be processed before continuing.

The grades listed in the Source Grades are those that have valid finals templates for the current season and have yet to be processed.

When the "Activate Finals" button is clicked, ladders for the selected grades are recalculated and teams are allocated to finals matches as per the finals template and their ladder positions.

Clicking on the Activate Finals button will begin the process.

 Please ensure that all match results for the season have been entered prior to activating the finals.
