

# Registration Types - State Body

A Registration Type is a means of categorising registrations into a specific group and defining the fee that must be paid when a player is registered. When a State user creates a derived Registration Type they must select the parent Registration Type from which the new Type will inherit. The Parent Type will determine the broadest possible age restrictions for the new type and the fee that the State Body must pay to the National Governing Body for each player registered.

 Before a State user can create Registration Types the National Governing Body must first create a set of standard Registration Types. Any question about the available Registration Types should be directed to the National Governing Body.

To create a new registration type Click on the **Add Registration Type** link or click on **Edit** link if you wish to change settings for an existing type

The following table describes each of the fields on **Registration Type Edit** screen

Field	Field Description
<b>Registration Type Group</b>	There are four options from the drop down list: <b>Players</b> - Suitable for competitive types <b>Non Players</b> - Suitable for non competitive registration types e.g. volunteers, parents... <b>Programs</b> - Suitable for one off registration e.g. social comp, events... <b>Other</b> - Any other registration types that do not fall into the above three categories
<b>Name</b>	The name of the Registration Type

<b>Description</b>	A specific description of the Registration Type
<b>Age Range</b>	Validation criteria. Setting the minimum and maximum age that is eligible for this registration type
<b>Active</b>	Determines whether or not the Registration Type is active. (Types that are no longer in use should be made inactive)
<b>Default Fee</b>	The fee that must be paid to current organisation for every person that is registered with this Registration Type (or a Registration Type that inherits from this Registration Type)
<b>Financial Type</b>	Financial / Non-Financial
<b>Default Person Role</b>	Registrant will be assigned to this selected default role as soon as he/she is registered with the registration type
<b>Allow Inherit</b>	Determines whether or not child organisations can create derived Registration Types using this Registration Type
<b>Registration Business Rules</b>	<b>Discounting Secondary:</b> Participants registered multiple times to this type will only pay once per period <b>Discounting Conversion (All):</b> Previous registrations against other types for this org will offset the cost of this registration <b>Discounting Conversion (Group):</b> Previous registrations against other types (in this group only) for this org will offset the cost of this registration <b>Allow Duplicates:</b> Multiple registrations for this type for a participant in this period from the same org are allowed (usually set for program registrations)

A Registration Type can be configured to apply different fees to each sub age group specified by the Parent Type. This allows Associations to offer special prices to certain groups of members while retaining the registration structure set by the State Body.

A list of fees for this Registration Type is displayed at the bottom of the **Registration Type Edit** page.

To change the details of a fee click the corresponding **Edit** link.
