

Program Enrolment

NSOs can determine whether registrants are automatically enrolled, or whether there is a manual enrolment process.

Automatic enrolments

For automatic enrolments, registrants will appear on the [Program Registrants](#) screen as "enrolled".

Manual enrolments

Where a manual enrolment process has been selected by the NSO, the Enrolment Manager screen allows the NSO to:

- filter registrants;
- select one or more registrants; and
- enrol / unenrol them individually, or in bulk by selecting the required **Action** and clicking the **Perform Action** button.

An example program enrolment screen is shown below:
