

Google Analytics Integration

This page allows integration with [Google Analytics](#) which can be used to monitor your website traffic. You will first need to sign up for a (free in most cases) account with Google Analytics. See the [Google Analytics website](#) for further information.

Enter the tracking code (beginning with UA-) that you receive from Google in the textbox. This places the Google Analytics tracking script on every page of your website.

Site Settings

Google Analytics Tracking Code

UPDATE

Log into Google Analytics to view and analyse your website statistics. To remove the tracking, clear the code from the textbox in the site settings.
