Pairs Cricket (Cricket LiveScore Tablet)

ResultsVault Cricket LiveScore FAQ

Settings for Pairs Cricket are available on the Matches screen.

Highlighted Features:

(1) To set the number of overs per batting pair, tap on **(–)** to reduce and **(+)** to increase the value. The batting team is divided into pairs and each pair bats for this duration, regardless of whether they are dismissed or not.

(2) To set starting score per innings, tap and enter value. Each team commences its innings with this total, to which runs are added as scored.

(3) To set number of runs subtracted from batting total at fall of wicket, tap on **(–)** to reduce and **(+)** to increase value.

(4) To set the number of times per batter that the batting team gets penalized for a wicket, tap on **(–)** to reduce and **(+)** to increase the value. If set to 'All', the batting team will get penalized every time a batter is dismissed as per **(3)**.

(5) To select whether or not to change ends at the fall of each wicket, use the toggle switch for 'change strike after a wicket'.

(6) To set number of runs added to the total of the bowling team at fall of a wicket, tap on **(–)** to reduce and **(+)** to increase the value.
