

Syncing Scores

Match scores are directly synced between the Scorer app and [Play-Cricket](#) website in three scenarios:

1. At the start of the match after completion of [Match Setup](#) and [Team Selection](#) in the Scorer App. Once the teams for the match have been selected, the match will show to be "In Progress" on the Play-Cricket website.
2. At the end of the match after completion of [Match Result](#).
3. By using the Sync scores option  - available on the [Scoresheet](#).

Note

If **end of over** Sync frequency is chosen in [Match Settings](#), scores will get synced automatically after every over to the [Play-Cricket Live](#) app. Use the Live app to follow over-by-over live-scores of a match in progress.
