Only 500 matches can be displayed at one time. If more than that are found, a message will indicate that only the first 500 are displayed, and you should then narrow your search criteria.

## Match List

Matches found are displayed in a list, that can be:

- **sorted** (by clicking on a table heading),
- **filtered** (by entering text in the Search box and pressing Enter), or
- **grouped** (by dragging a column heading to the top of the table). Each page of information can be displayed by clicking the Page numbers at the bottom of the table.

- **Change status to OFFICIAL** - matches will be changed to an OFFICIAL status (match are locked)
- **Change status to IN PROGRESS** - matches will be changed to an IN PROGRESS status (matches are unlocked).
- **ABANDON matches** - the match result type will be changed to ABANDONED, and the status changed to OFFICIAL.
- **POSTPONE matches** - the match result type will be changed to POSTPONED, and the status changed to OFFICIAL. If the match is played at a later date, it can be changed to an IN PROGRESS status, in which case scores and a new result type can be entered by the competing teams.
- **Recalculate ladders** - This will do a ladder recalculation on any underlying ladders where a match result or a ladder adjustment has been entered since the last ladder recalculation. If the ladder is up to date, no recalculation will occur. This is different to triggering a calculation from the Ladder Maintenance screen, as ladders are 'forced' to be recalculated from the screen whether changed or not. Usually ladders can be left to recalculate automatically overnight, and it should not be necessary to recalculate from this screen.
- **Print Scorecards** - This option will only appear for those sports that have scorecards defined. Choosing this option will generate a PDF file consisting of scorecards for every match selected containing match information and the player squads for each team.
