Activate MyNetball Payments

There are currently two payment gateways fully supported on MyNetball.

MPS Disbursement Gateway (primary):
The MPS Disbursement Gateway is the primary gateway used by majority of clubs and associations. The gateway disburses payments weekly and automates the distribution of membership fees, to clubs, associations and state bodies. Another benefit of using the primary gateway is that it will allow registrants/parents to save their credit card details on future signup forms.

MyNetball Payment Service (secondary):
The other service supported is a secondary gateway, provided by our payments partner Pin Payments. This involves creating a Pin Payments account and individuals' payments are directed to the club/associations nominated bank account. The first step to activate a secondary gateway is to apply directly to PIN Payments using their secure sign up service located here https://pinpayments.com/get-started/netballaustralia , the second step is to supply your PIN Payments API Keys to us, instructions on how to do this once the service is activated can be found here Get API Keys

Costs in using the primary vs secondary gateways per transaction:

Primary – 1.75% + $0.30 per transaction
Secondary – 2.15% + $0.30 per transaction
