

Linking to ResultsVault from external web sites

Using the ResultsVault Menu page

The ResultsVault menu page is the easiest way to integrate ResultsVault pages into an external website. This page provides a simple pull down menu to access all public ResultsVault pages, and is suitable for hosting within an IFRAME on your site. Furthermore, querystring arguments can be passed in to control the behaviour of the page.

Menu URL: [http://\[sport\]2.resultsvault.com/menu.aspx](http://[sport]2.resultsvault.com/menu.aspx) (eg <http://cricket2.resultsvault.com/menu.aspx>, <http://football2.resultsvault.com/menu.aspx>)

Arguments:

- &entityid=e - (required) the ID* of the club/association to display results for
- &width=w - controls the width (px) of the pages within the internal iframe
- &height=h - controls the height (px) of the pages within the internal iframe
- &showname=1/0 - displays the name of the club/association at the top of the page 1=show, 0 or omitted, hide
- &css=path to css - allows an external css file to be specified to enable overriding of styles

*See the links table below for your entityid

For example you could use the following on a page in your website:

```
<IFRAME SRC="http://cricket2.resultsvault.com/menu.aspx?entityid=9999&width=800&height=1000&css=http://www.myserver.com/style.css">
```

Please contact us for more information about using an external css file.

SportzVault

Looking for a club web site? SportzVault allows you to build a great looking site in a matter of minutes - and it integrates with ResultsVault.

Visit <http://www.sportzvault.com> for more information.

Linking directly to MyNetball pages

You can use the following urls to use as links within the pages of your club website in order to link directly to the MyNetball pages which contain information relevant to your club.

As we use cookies in our site, it is necessary to use these links when accessing from outside MyNetball - otherwise unpredictable results could occur.

Where pages are dependent on a round (eg match results) the current round will be displayed, which can then be changed by the user.

For example, to link (and popup a new browser window) directly to the team selection page you could use the link:

```
<A HREF="http://admin-netball.resultsvault.com/go.aspx?id=TEAM&entityID=xxx*" TARGET="_blank">Team Selections</A>
```

Control of headers and footers

For clubs and associations with separate web sites (not including *SportzVault* sites - as integration is already built in), it may be desirable to link to MyNetball content in a FRAME or an IFRAME.

In this case, you may want to hide the standard MyNetball headers and footers.

To do this, simply replace the *uat-netball* in the url with *uat-netball2* - for example

http://uat-netball2.resultsvault.com/go.aspx?id=TEAM&entityID=xxx*

*xxx should be replaced by the appropriate entity ID as listed in the links table below.

Links

The links shown below relate to Netball Australia.	
To Copy a link to the clipboard simply double click it (if you are using Microsoft Internet Explorer).	
Show links with header and footer control (see above)	<input type="button" value="NO"/> <input type="button" value="YES"/>

No records found

To link to one of the above 'grade specific' reports without a specific grade (ie to allow the user to then select a grade) simply omit the gradeID value.

Some pages also give an ALL GRADES view - use gradeID=0 instead of specifying a particular grade.

A particular round can be accessed by appending &round=round number to the end of the link (where *round number* is the particular round: 1,2,3 etc or SF, QF,PF,GF).

No records found

Please contact Interact Sport for enquiries about links to other pages.

Linking directly to Rugby Link pages

You can use the following urls to use as links within the pages of your club website in order to link directly to the Rugby Link pages which contain information relevant to your club.
As we use cookies in our site, it is necessary to use these links when accessing from outside Rugby Link - otherwise unpredictable results could occur.

Where pages are dependent on a round (eg match results) the current round will be displayed, which can then be changed by the user.

For example, to link (and popup a new browser window) directly to the team selection page you could use the link:
`Team Selections`

Control of headers and footers

For clubs and associations with separate web sites (not including *SportzVault* sites - as integration is already built in), it may be desirable to link to Rugby Link content in a FRAME or an IFRAME.
In this case, you may want to hide the standard Rugby Link headers and footers.
To do this, simply replace the www in the url with www2 - for example
`http://www2.rugbylink.com.au/go.aspx?id=TEAM&entityID=xxx*`
*xxx should be replaced by the appropriate entity ID as listed in the links table below.

Links

The links shown below relate to Australian Rugby Union.	
To Copy a link to the clipboard simply double click it (if you are using Microsoft Internet Explorer).	
Show links with header and footer control (see above)	<div>NO</div> <div>YES</div>

No records found

To link to one of the above 'grade specific' reports without a specific grade (ie to allow the user to then select a grade) simply omit the gradeID value.
Some pages also give an ALL GRADES view - use gradeID=0 instead of specifying a particular grade.
A particular round can be accessed by appending &round=round number to the end of the link (where round number is the particular round: 1,2,3 etc or SF, QF,PF,GF).
