

# Scoring (Tablet)

You will be presented with two options after you have selected your team in readiness to score - Live or Final Scores.

**Highlighted Features:**

- (1) Choose 'Live' to score the match live and sync play by play events to ResultsVault.
- (2) Choose 'Final Scores' to enter final match and player scores to bypass live scoring. These results also sync to ResultsVault upon match submission.

- (1) Tap to Save the match scores before exiting the match. Matches can be resumed at anytime by tapping on the match in the matches list screen.
- (2) Displays the line ups for each time. This allows for assigning stats to players.
- (3) Brings up the match settings options.
- (4) Pauses the game clock. Note you will need to pause the game clock before adjusting the clock.
- (5) The 'Score' TAB shows the match scoring buttons where goals and stats can be recorded in real time. The Match Log keeps an audit of actions like goals or stats listed by time. Actions can be deleted or edited on this screen.
- (6) Where goal and stats can be recorded. If player stats are turned on, the next screen will allow the scorer to assign the goal to a player.
- (7) Removes the last action completed.

#### Note

Press 'END HALF' to end the half at anytime. You will be asked to confirm the action before the app ends the play after pressing.

Press 'MATCH ACTIONS' to sub players.
